atom economy for fermentation < atom economy hydration (1)
In fermentation, $\mathrm{CO}_{2}$ is produced in addition to ethanol/ethanol is not the only product (1)
In hydration, ethanol is the only product/hydration is an addition reaction (1)
Atom economy of fermentation could be increased by finding a use $\mathrm{CO}_{2}$ (1)

Atom economy linked to a chemical equation to show that hydration has $100 \%$ atom economy/fermentation has $51 \%$ atom economy (1) 7 max
