## GCSE MARKING SCHEME

## SUMMER 2022

GCSE
SCIENCE (DOUBLE AWARD) - UNIT 6 FOUNDATION TIER 3430U60-1

## INTRODUCTION

This marking scheme was used by WJEC for the 2022 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCSE SCIENCE (DOUBLE AWARD) - UNIT 6 - PHYSICS 2

## FOUNDATION TIER

## SUMMER 2022 MARK SCHEME

## GENERAL INSTRUCTIONS

## Recording of marks

Examiners must mark in red ink.
One tick must equate to one mark (apart from the questions where a level of response mark scheme is applied).
Question totals should be written in the box at the end of the question
Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.
Marking rules
All work should be seen to have been marked.
Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.
Crossed out responses not replaced should be marked.
Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.

## Extended response question

A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statement.

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.
cao = correct answer only
ecf $=$ error carried forward
bod $=$ benefit of doubt
owtte $=\quad$ or words to that effect

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 1. | (a) | (i) (ii) (iii) <br> (iii) |  | Number of cake cases (1) <br> Time of fall (1) <br> Speed up (1) | $\begin{aligned} & 1 \\ & 1 \end{aligned}$ | 1 |  | 3 |  | 3 |
|  | (b) | (i) | 0.75 [s] circled | 1 |  |  | 1 |  | 1 |
|  |  | (ii) | Sum $=0.55+0.56+0.55+0.58=2.24(1)$ <br> Mean $=\frac{2.24}{4}=0.56[\mathrm{~s}]$ (1) Accept 0.6 s where this calculation is shown <br> Award only 1 mark for the mean if 0.75 is included (mean $=0.60$ [s]) <br> Award only 1 mark if no workings are shown and answer of 0.6 [s] or 0.598 [s] <br> Don't accept 0.59 [s] <br> Alternative: $\begin{aligned} & \frac{1.50}{2.7}(1) \\ & =0.56[\mathrm{~s}](1) \text { accept } 0.555[\mathrm{~s}] \text { or } 0.6[\mathrm{~s}] \end{aligned}$ <br> Award 1 mark for $\frac{150}{2.7}=55.5$ or 56 | 1 | 1 |  | 2 | 2 | 2 |

| Question |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | AO1 | AO2 | AO3 | Total | Maths | Prac |
| (c) | (i) |  | All points plotted correctly $<1$ small square tolerance award 2 marks (ignore $(0,0)$ ) <br> 4 points plotted correctly < 1 small square tolerance award 1 mark <br> 3 or fewer points plotted correctly < 1 small square tolerance award 0 marks <br> Smooth curve passing through the points between 1-5 on the number of cake cases $<1$ small square tolerance (1) |  | 3 |  | 3 | 3 | 3 |
|  | (ii) | Increases (1) <br> Decreasing (1) |  | 2 |  | 2 |  | 2 |
|  |  | Question 1 total | 4 | 7 | 0 | 11 | 5 | 11 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | AO1 | AO2 | AO3 | Total | Maths | Prac |
| 3. | (a) |  |  | Order is: B, C, A, D. <br> 3 marks for all 4 correct <br> 2 marks for 2 or 3 correct <br> 1 mark for 1 correct | 3 |  |  | 3 |  | 3 |
|  | (b) |  | Any $2 \times(1)$ from: <br> - Move the ruler nearer [the spring] <br> - Clamp the ruler in place / ensure the ruler is vertical <br> - Use a ruler marked in mm or with better resolution. Accept measure in mm . <br> - Use a pointer [from the (bottom of the) spring to the ruler] Don't accept use a laser pointer. <br> Don't accept repeat the experiment or use a metre ruler or use a camera or more accurate ruler. |  |  | 2 | 2 |  | 2 |
|  | (c) | (i) | 4 [N] | 1 |  |  | 1 | 1 | 1 |
|  |  | (ii) | $\begin{aligned} & k=\frac{4 \mathrm{ecf}}{8}(1) \\ & =0.5[\mathrm{~N} / \mathrm{cm}] \end{aligned}$ | 1 | 1 |  | 2 | 2 | 2 |
|  |  | (iii) | $400 \mathrm{~g} \text { to } 200 \mathrm{~g}(1)$ <br> So 8 cm goes to 4 cm (1) [so the claim is false]. <br> Alternative: <br> Mass is half of 400 g (1) <br> So the extension is 4 cm (1) [so the claim is false]. <br> Alternative: <br> 2 cm is a quarter of the 8 cm extension (1) <br> so the force is $1 \mathrm{~N} /$ mass of $100 \mathrm{~g}(1)$ [so the claim is false]. |  |  | 2 | 2 | 1 | 2 |
|  |  |  | Question 3 total | 5 | 1 | 4 | 10 | 4 | 10 |

| Question |  |  | Marking details | Marks Available |  |  |  |  |  |
